

# Keeping God's Creation Clean.

The title I chose is Keeping God's Creation Clean, I chose this because I want to help save our world.

I've been investigating ways to do this and found some that I would like to share:

## **Reduce, Reuse and Recycle.**

Using a water butt to water plants. Plants *ACTUALLY* prefer dirty/rain water.

Composting old vegetable peelings, fruit waste, and plant and grass cuttings. **DO NOT** put bones, meat, dairy or fish into compost! Compost is a healthier soil for growing plants.

## **Further my education.**

I'd like to further my education on helping the world. The more I can find out how to do this, the more I can help and the more I can share the information with others so that they can help too.

## **Put your rubbish in the bin.**

Littering causes lots of problems. Animals can choke on it or get it tangled around them. Litter also carries disease that makes people and animals ill. Litter looks bad too, there are always bins around – nobody should just throw rubbish on the floor.

**Did you know? 100,000 mammals are killed every year from litter!**

Quotes from holy books that fits with my work are:

A verse from the Bible:

**"God saw all that he had made, and it was very good"** Genesis 1:31

A quote by Abdu'l – Baha' (head of Baha'I Faith) wrote:

**"... to man God has given such wonderful power that he can guide, control and overcome nature"**

Jewish wrote about the environment:

**"And God said: 'Behold, I have given you every herb yielding seed, which is upon the face of all the earth, every tree, in which is the fruit of a tree yielding seed — to you it shall be for food'"** Gen 1:29

All religions reflect that God wants us to look after the world.

On my picture you can see half of the world being ruined however the other half shows how WE COULD keep our world if we all made some small changes. This work has made me realise how precious our world is. While I was making this, I thought a lot about what I can do to help our environment and I would like to say that I hope my picture will help others look at ways that they can also save our world too.
